

INDUSTRIES WE SERVE

TELECOM

Developing fiber optic networks.

OIL & GAS

Connecting onshore and offshore assets.

OCEAN OBSERVING

Protecting the ocean environment.

PROFESSIONAL SERVICES

- Market & Feasibility Studies
- Due Diligence Reviews
- Financing Strategies
- System & Route Design
- Permitting & Authorizations
- Technology Assessment
- Request for Proposal Formation
- Bid Review & Vendor Negotiation
- Network Project Management
- Testing & Commissioning
- O&M Negotiations
- NOC Services

SUBSEA INTEGRATION AND ENGINEERING SERVICES TO THE U.S. GOVERNEMENT

OUR ABILITIES

Ocean Specialists, Inc. (OSI) is a systems integration and subsea engineering company that specializes in successfully delivering end to end undersea projects to our customers. Applications include data collection, processing and transmission; subsea control of equipment and sensors and; system monitoring & control and data transmission. We specialize in all aspects of planning, engineering, implementing and operating subsea systems for a range of United States Government applications. OSI is dedicated to delivering high-quality products and services on a global scale, with project experience ranging from regional to international networks throughout the Americas, Asia, Pacific, Africa and Europe.

In addition to the capabilities inherent to OSI, sister companies CSA Ocean Sciences and Sea Robotics bring specific experience in environmental engineering and unmanned systems. The combined resources of these entities are capable of addressing many needs of U.S. Navy and other USG requirements. We work with our customers from the very early stages of a project to include environmental impact studies and sampling, permitting and authorizations, and geophysical surveys through product development, delivery and operations.

OUR APPROACH

OSI's approach is designed to ensure project success by mitigating the significant risks inherent in a subsea network development project. We work with our clients to take ownership across the full development life cycle, managing critical elements of the business forming, technology assessment, supplier selection, and manufacturing and installation quality assurance processes.

OUR CLIENTS

- U.S. Army Corps of Engineers
- U.S. Department of Commerce
- U.S. Department of the Interior
- U.S. Department of the Navy
- U.S. Environmental Protection Agency

INDUSTRIES WE SERVE

TELECOM

Developing fiber optic networks.

OIL & GAS

Connecting onshore and offshore assets.

OCEAN OBSERVING

Protecting the ocean environment.

PROJECTS COMPLETED

- 26 Full Network Development
- 33 Permitting, Survey & Post Implementation Assessments
- 30 Financing Support & Guidance
- 53 Technical & Commercial Recommendations
- 94 Market Feasibility Studies
- 15 Landing Station, Colocation & Backhaul Planning

CORPORATE GROUP RESOURCES

OSI is part of the Continental Shelf Associates, Inc. family of companies which gives us access to all of the group's capabilities.

MARINE SCIENCES

Our group's multidisciplinary marine sciences team provides independent, credible surveys, assessments, baseline and incident-related studies and data analyses to governmental entities and companies active in the marine and coastal environment.

ENVIRONMENTAL DATA & GEOSPATIAL SERVICES (EDGS)

The EDGS team serves clients by helping them integrate, manage, share, visualize and present environmental data and related information through a customizable, user-friendly cloud-based platform.

MARINE OPERATIONS

Our marine operations staff has extensive operational experience conducting multidisciplinary surveys in support of coastal and marine environmental programs and integrated efforts to collect physical data from the world's aquatic environments.

TOOLING & EQUIPMENT

Our corporate group has the in-house capability to design, build and deploy tools used in environmental sampling programs and surveys. The group also includes a company that rents a broad catalog of marine scientific tools and instruments.

TECHNOLOGY DEVELOPMENT

Within our family of companies, we have the capability to design and build a range of sophisticated unmanned marine systems backed by world-class field support and training for use in survey, security and maintenance applications.

GLOBAL NETWORK OPERATIONS

We provide 24x7 network monitoring and management from a fully staffed Network Operations Center. Our network team supports carriers, enterprise and science customers.
